

Daily Reading

To keep skills sharp you need to read every day. Read out loud if you can - let someone in your home enjoy your story or information. Remember it doesn't need to be a book from school - anything will do. Don't forget to be expressive.
Parents - ask questions to make sure their understanding is good. The attached reading assessment focus from last week will help you.

Writing task

Using <http://www.pobble365.com> select a picture and follow the activities. Choose a picture you are interested in.

Parents - I've added Writing Steps to Success in the Classwork section. This will help you and them know what to work on next.

PE

Use Lucy's 7 minute step work out (<https://www.youtube.com/watch?v=xFvLU8TQY5g>), or join in with 'P.E. with Joe' who is doing daily lessons on youtube. **Coco** recommends: a 'strictly' dancing workout with **Oti Mabuse**.

Numeracy focus

Spending time on maths problem solving is really important! Remember to take your time and start with what you know. You can spend time explaining **how** you worked out a problem with another person in your house, or even online. Look at how they did it - you might learn a way to be more **efficient**.

There are loads of problem solving websites but try this: White Rose <https://whiterosemaths.com/homelearning/websites>.

The nrich website has some stretchy ideas too but look at it with a parent - there's a lot of text to navigate.

I will be adding some daily Maths problems too.

Topic

Try looking into the music, fashion and news of the **1960s**. Lots of things changed during this period of time. For example:

The Beatles, Space Exploration, Human Rights.

Try to create a **scrapbook** of information - drawings, news and your own family history of what happened throughout the **decade**.

P4C - Find this week's news and spend some time talking to adults about it. You might want to follow up on some of the ideas - like write a letter or make a card to send to family/friends.

Other stuff!

For your parents:

Use the websites attached to guide you as they provide learning opportunities for all sorts of curriculum areas which will help keep your child engaged. Allow your child to choose but monitor these choices carefully so your child isn't always in the comfort zone. Remember good learning means mistakes are made - if everything is right, your child is using skills they already had.

Cooking is a vital real life skill your child can learn and baking is a great way to teach age appropriate maths such a fractions through sharing, weighing and measuring etc.

Make sure your child still gets lots of exercise - sitting glued to a device is not physically or mentally healthy.

Picture News - there are a couple of files attached. My class usually get to see a copy of the paper to read. We usually hold P4C discussions weekly about themes and issues that come up from the day/previous week.
