

ANDREAS HOME LEARNING - SILVERDALE CLASS - WEEK 6 - 4th May 2020

Daily Reading

Keep using Oxford Owls as this is a great way to find the right level books for your child. Use the reading assessment focus sheet (sent in week 1) to help you to ask the right kinds of questions!

This week I'd also like you to read and follow a recipe! It could be any recipe (perhaps connect this task into the History task further down!). As you're reading and working through it, try to think about what **thinking moves** you're using.

Writing task

Talk for Writing - Home School Booklets

I hope you're enjoying your activities in these packs! Keep going this week!

Year 2 - The Magical Teaching Box.

Year 2 will be reading the mythical story 'Pandora's Box' and it gives opportunities to draw, create, play with words and read and write poetry.

Here's the link to the activity pack - <https://www.talk4writing.co.uk/wp-content/uploads/2020/04/Y2-Unit.pdf>

Year 3 - The Truth about Trolls

Year 3 will be learning all about trolls with troll expert 'Professor Folklore'. You'll be dreaming up some of your own interesting and amazing information to set the record straight and not let trolls just be known as nasty, mean creatures! Along with creating information texts, you'll be investigating adjectives, alliteration and adverbs. Here's your activity pack link - <https://www.talk4writing.co.uk/wp-content/uploads/2020/04/Y3-Unit.pdf>

Numeracy focus

Spending time on maths problem solving is really important but don't be tempted to do it for your child. Investigating, learning through trial and error and figuring your own way through a problem is crucial. There are loads of problem solving websites but the n'rich website is really stretchy!

I hope you're managing to keep going with the maths lessons on [whiterosemaths.com](https://www.whiterosemaths.com).

Fractions - Year 2 - (Week 4/ Summer Term Week 2) Compare and order lengths, four operations with length and then problem solving. You might even find out some interesting facts about dinosaurs! Watch the videos and then follow up with the activity - if you don't have the ability to print it off, just complete it on screen.

Fractions - Year 3 - (Week 4/ Summer Term Week 2) Adding fractions and problem solving! Loads of these lessons use the part whole models which you should be really familiar with already and also use bar models - see if you can spot them! Watch the lesson videos & complete the activities - again, you don't have to print them off to complete them!

History - VE Day!

In May 1945 Germany surrendered to the Allies and, after six long years of fighting, the war in Europe came to an end. Millions of people up-and-down the country greeted the news with bonfires, bunting, parades and parties, and there was singing and dancing in the streets.

Here's your chance to plan your own VE Day style party! I've attached a pack (from English Heritage) full of recipes, song lyrics and dance instructions so you can really celebrate in (40s!) style!

Send any photos of your party to enquiries@andreas.sch.im

What **thinking moves** do you need to use when planning your party? What about when setting it up and getting everything ready?

Perhaps you could design a VE Day medal. Here's an image of the original version which was given to soldiers who had fought in active theatres of the war. It was a symbol of great pride but its design was also highly symbolic.

Bronze medal, not too expensive after the war, but long lasting.

Other stuff!

Use the websites attached to guide you as they provide learning opportunities for all sorts of curriculum areas which will help keep your child engaged. Allow your child to choose but monitor these choices carefully so your child isn't always in the comfort zone. Remember good learning means mistakes are made - if everything is right, your child is using skills they already had.

Cooking is a vital real life skill your child can learn and baking is a great way to teach age appropriate maths such as fractions through sharing, weighing and measuring etc. Make sure your child still gets lots of exercise - sitting glued to a device is not physically or mentally healthy.

Google search for 'Thanks and 'speaking and listening activities' and have some interesting conversations with your child that will develop their thinking and oracy skills.

PE - Have a look at 'The PE Shed' (<https://www.thepeshed.com>). It's got loads of ideas for keeping fit and healthy.

Thinking Moves - Listen/Look!

Here's a suggestion from Kew Gardens in London...

Go outside, or open the window and...
LOOK at 5 things
LISTEN to 3 things
SMELL 1 thing
And don't do anything else for **5 minutes**
