

What do you think? Why?

If you swapped brains with your friend, would you be the same person?

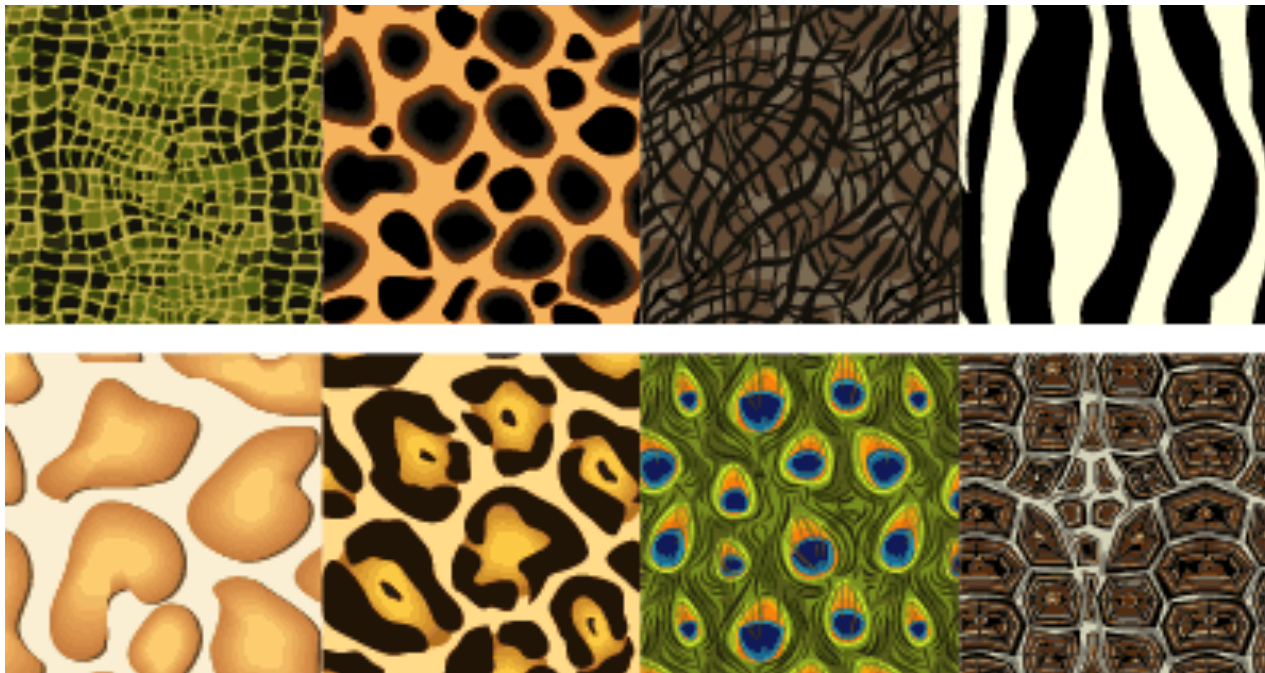

Time to think back

We have been looking at animal categories.

How many can you name?

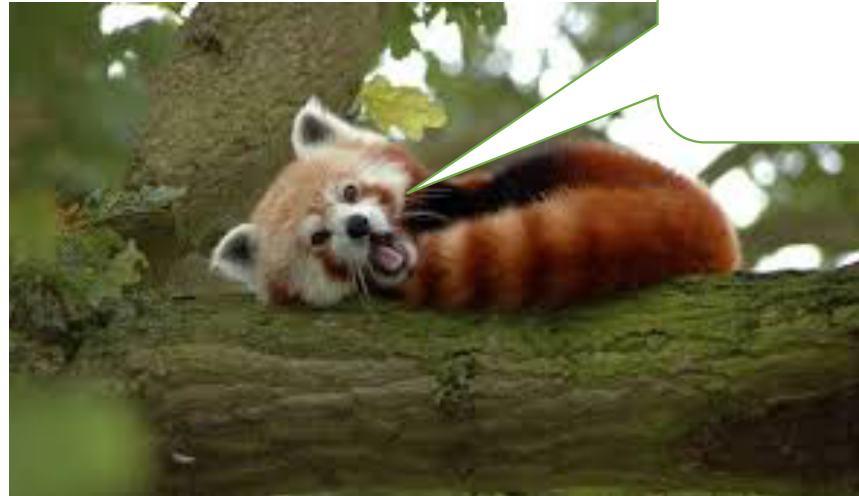

We are moving onto habitats!

There are lots of different habitats that suit lots of different animals, have a look!

Some creatures live alone  
in their habitat.

Can you think of any more?

Some creatures live in communities and work together to survive.

*Can you think of any more?*
